Education

Dhirubhai Ambani University — 2023 - Present
***CPI**: 8.57* — *Gandhinagar, Gujarat*

12th School Name (GHSEB) — 2022 - 2023
***Percentage**: 78.62%* — *Bharuch, Gujarat*

10th School Name (GSEB) — 2020 - 2021
***Percentage**: 96.5%* — *Bharuch, Gujarat*

Experience

Craft Silicon Foundation — 4th DEC 2024 – 20th DEC 2024
Social Intern — *Mansa, Gujarat*

- Conducted community outreach and education through a mobile "Computer Bus" initiative led by the Craft Silicon Foundation.
- Taught foundational computer literacy to rural school students, including hands-on experience with educational software and basic programming tools.
- Delivered sessions on various academic subjects and organized interactive learning activities and competitions to boost student engagement.

Projects

AlgoByte | *React.js, Express.js, Node.js, MongoDB, Tailwind CSS, Socket.IO*

- Implemented JWT-based authentication, role-based access (Admin/User), and secure routing.
- Developed contest system with real-time leaderboard, scheduled problems, and live submissions.
- Integrated Judge0 API to support multi-language code execution with Run Submit modes.Support for custom inputs, submission evaluation, and result feedback with success/failure status.
- Built live code-sharing rooms using Socket.IO where multiple users can edit the same code simultaneously.Room host can share a link to invite others; all changes sync instantly across connected users.
- Users can join a discussion forum.Whole community discuss about recent updates on technology
- Designed admin dashboard to manage problems and contests (Create, Update, Delete).Problems include tags, difficulty levels, constraints, test cases (visible/hidden), and starter code in multiple languages.
- Added activity tracking with streak logic and a dynamic contribution heatmap
- Responsive and theme-aware UI using Tailwind CSS + DaisyUI with light/dark mode support.

SOLBANK | *React.js, Express.js, Node.js, MongoDB, Tailwind CSS, Solana Web3.js*

- Developed a full-stack Web3 wallet for the Solana Devnet.
- Implemented account creation using mnemonic seed phrases (BIP39), encrypted and securely stored using CryptoJS.
- Enabled SOL token transfers, airdrop requests, and real-time balance updates.
- Created modular components for send/receive flows, private key reveal (secure/decrypted), and multi-account support per wallet.
- Designed and integrated a modern, responsive dashboard UI with private key encryption, secure authentication, and animated feedback.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL(Basic)
Developer Tools: Git, Postman, VS Code, GitHub
Frameworks: React.js, Node.js, Express.js, Tailwind CSS
Cloud/Databases: MongoDB, PostgreSQL
Soft Skills: Team Collaboration, Leadership, Problem Solving, Communication, Time Management
Coursework: Data Structures and Algorithms, DBMS, OOP
Areas of Interest: Full Stack Development, Blockchain, Web3
